mgd
Multiplexed

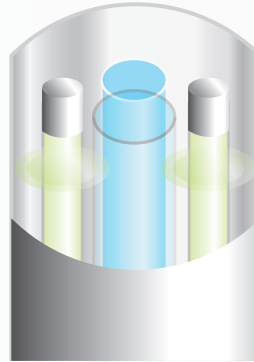

With non-contact design and flip panel access, it's our most advanced design yet.

Models for all applications

Over 19,000 applications on 5 continents.
Municipalities, OEM's, Specifiers and
Distributors trust Hallett for effective
UV disinfection.

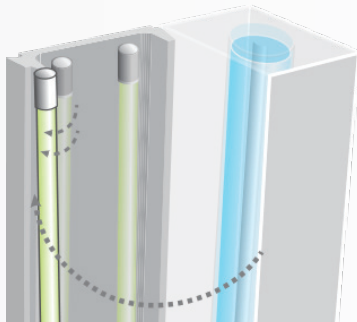

Patented self-cleaning prevents quartz fouling.

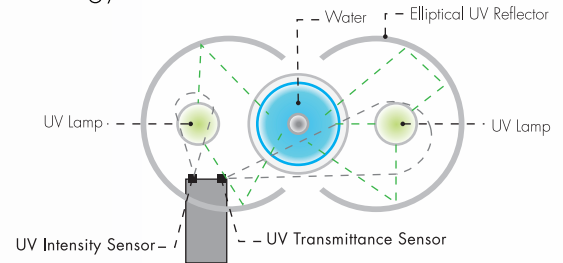

Excellent performance in very hard water and low UVT applications with Crossfire Technology®.

New case, engineered for quick and easy lamp changes.

Dual UV sensors and smart technology.

Good for all applications

Potable

Reuse

Waste

"E&W Equipment has worked with UV Pure Technologies for several years, and we are pleased to report that their unique self-cleaning Crossfire Technology, has become our UV system of choice for lower flow applications. We are really looking forward to UV Pure's next generation of systems, the H 60 product line, both because of the larger flow capacity, and their EPA, NWRI, and Wastewater validation. These improvements should mean a dramatically larger market for our applications incorporating Hallett systems. Congratulations to the UV Pure team!"

John Smith
Vice President & Regional Manager

There's so much more to Hallett.
Let us show you what Pure, Safe Water. *Always*® means to us.
